Blackberry Creek Watershed Planning

Welcome!

Hosted by Sugar Grove Township August 16, 2011

11

Blackberry Creek Watershed Action Plan

Plan Recommendations Chapter *Overview*

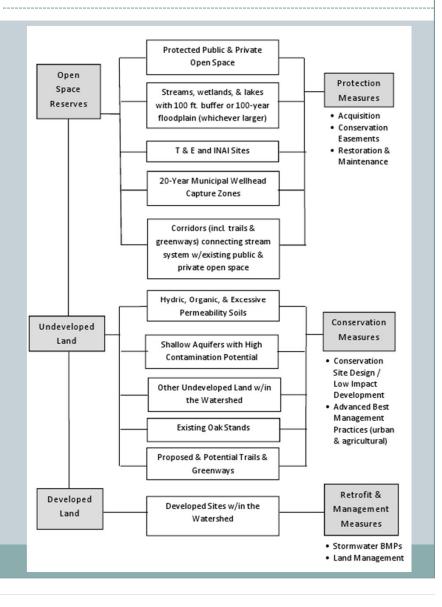

Blackberry Creek Watershed Planning Meeting August 16, 2011

BLACKBERRY CREEK WATERSHED GOALS

- Reduce fecal coliform contributions
- Reduce nutrient and other emerging pollutant loadings
- Minimize sedimentation, siltation, and streambank & streambed erosion
- Reduce risk of flooding through initiatives to improve water quality
- Protect groundwater resources
- Promote awareness of watershed resources and threats

WATERSHED PLAN RECOMMENDATIONS

Green Infrastructure Framework for Watershed-Wide Recommendations

POLICY & PLANNING RECOMMENDATIONS

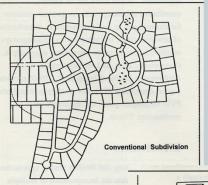

Review of Comprehensive Plans

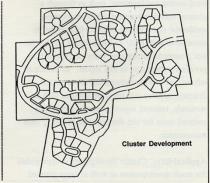

- Conserving Natural Areas and Open Space
- Promoting Green Infrastructure Approaches to Manage Stormwater Runoff
- Promoting Efficient, Compact Development Patterns
- Promoting Efficient Street and Parking Lots Designs to Minimize Impervious Surfaces
- Integrating Land Use and Water Supply& Demand Planning

POLICY & PLANNING RECOMMENDATIONS

Review of Local Ordinances

- Comprehensive Stormwater Management
- Conservation Design
- Natural Landscaping
- Impervious Area Reduction
- Water Use Conservation

BMP RECOMMENDATIONS

Strategies to Reduce Nonpoint Source
 Pollutant Loads to Protect Surface Waters

- Stream Channel, Riparian Corridor, & Shoreline Protection & Rehabilitation
- Education & Outreach Programs
- Agricultural / Rural BMPs
- OUrban BMPs

 Stream channel, riparian corridor, and shoreline protection & rehabilitation

- × Minimize imperviousness
- Native vegetation buffers
- Exclusion (ORVs, livestock)
- Streambank, stream channel, & shoreline stabilization practices

• Education & Outreach

- × Community Concerns
- × Target Audiences
- × Approaches
- × Tools

Agricultural / Rural BMPs

- Constructed Wetlands / Wetland Restoration
- Grassed Waterways
- × Filter Strips
- Conservation Tillage
- × Nutrient Management
- × Livestock Exclusion
- × Manure Management
- Roadside Bioswales

Photo courtesy of USDA NRCS

Septic System Inspection & Maintenance

O Urban BMPs

Land & water management practices
Landscaping and turf management practices
Road de-icing products and practices
Water use conservation programs
Rain garden & rain barrel programs

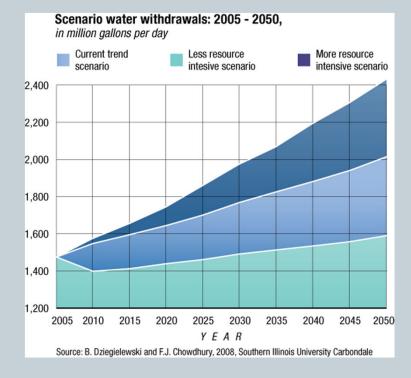

O Urban BMPs

- Stormwater Retrofits
 - Existing stormwater ponds
 - Downstream of outfalls
 - Within the existing conveyance system
 - Within transportation rights of way
 - Large & small parking lots
 - Hotspot operations
 - Individual rooftops
 - Landscape and hardscapes
 - Individual streets
 - o Underground

BMP RECOMMENDATIONS

Strategies to Protect Groundwater Resources Quality

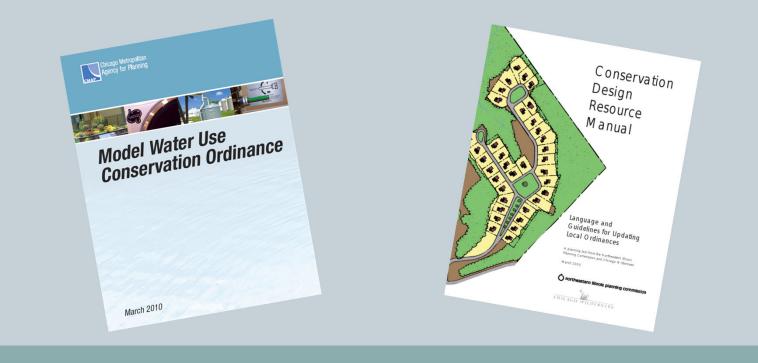

CWS WELLS WITH PHASE I AND II WHPA'S AND ADJACENT LUST SITES

Strategies to Protect Groundwater Resources

OQuantity

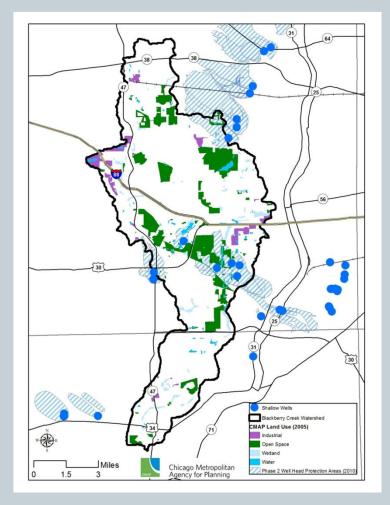

- × Water use conservation ordinance
- × Conservation design principals (minimize imperviousness)

Strategies to Protect Groundwater Resources

• Quality

- Prepare wellhead protection plans
- Adopt maximum setback zones
- × Delineate 20-yr capture zones
- Seal abandoned wells
- Designate Class III Special Resource Groundwater (fens)
- Establish unwanted medicine and household hazardous waste drop-off programs

WATERSHED PLAN REQUIREMENTS

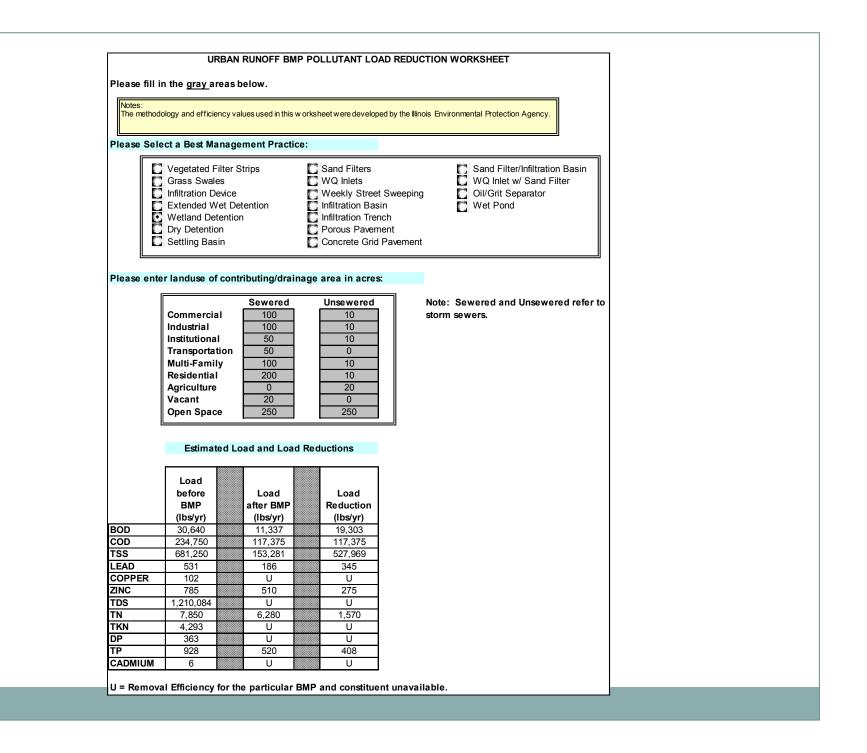

- Description of Best Management Practice
- Project Location on Map (as applicable)
- Unit and Quantity
- Cost
- Project Lead, Partners
- Estimated Pollutant Load Reduction
 - Sediment
 - Total Suspend Solids
 - Phosphorus
 - Nitrogen

| Table 6-1: BMP implementation | projects wi | uresu | nated costs and ponutant | ioau reductions. | Nitrogen | Phorphorous | Codimont | Chlorida | Facel as life | Land and the second |
|---|----------------|---------|--|--|----------|---------------------|--------------------|------------------|-------------------------------------|---------------------|
