

Ferson-Otter Creek DRAFT Goals

Revised 11/15/10

- 1) Reduce fecal coliform contributions to Ferson and Otter Creek.
- 2) Reduce nutrients, sediments, and other pollutant contributions to Ferson and Otter Creek.
- 3) Raise stakeholder (residents, public officials, etc.) awareness about the importance and best management practices of proper watershed stewardship.
- 4) Promote land use and best management practices that minimize increases in the volume of stormwater runoff and reduce the risk of flood damage.
- 5) Protect the quality and quantity of our water supply.
- 6) Improve the physical condition of our waterways through streambank stabilization, erosion protection, increased conveyance, and other effective strategies.
- 7) Develop an effective and lasting Watershed Stakeholder Coalition to foster continuing stewardship efforts in the watershed.

Created 10/20/10

- 1) Reduce fecal coliform contributions in Ferson-Otter Creek Watershed.
- 2) Reduce nutrients, sediments, and other pollutants.
- 3) Educate stakeholders (residents, public official, etc.) about the importance and best management practices of proper watershed stewardship.
- 4) Promote land use practices that do not increase in the volume of stormwater runoff and reduce the risk of flood damage.
- 5) Improve the quality and quantity of our water supply.
- 6) Improve stream bank stabilization, erosion protection and conveyance.
- 7) Formulate or identify a Watershed Coalition that is responsible for continuing efforts in the watershed.

*Please note that these goals are not static and can be revisited throughout our planning process as we develop a more informed understanding of our watershed.
